DETAILED ACTION

Response to Amendment

Claims 1-7, 9-17, 20-21, 23-24, and 26-36 are in the case.

Claims 8, 18-19, 22, and 25 are canceled.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

1. Claims 32-35 are rejected under 35 U.S.C. 102(e) as being anticipated by Nakamura et al (6,390,041).

Nakamura et al teach an intake system of an internal combustion engine comprising an intake valve 12 and a variable valve actuation mechanism comprising a drive shaft 13, an eccentric cam 15 driven by the drive shaft 13, a first link 24 fitted to an outer periphery of the eccentric cam 15 to permit relative rotation of the first link 24 to the eccentric cam 15, a control shaft 32 arranged parallel to the drive shaft 13 and comprising a control cam 33, whose axis is eccentric to an axis of the control shaft 32, a rocker arm 23 fitted to an outer periphery of the control cam 33, wherein the rocker arm

is connected at one end to the first link 24 so that oscillating motion of the rocker arm is produced through the first link 24, a second link rotatably connected to another end of the rocker arm 23 and a rockable cam rotatably supported on the drive shaft 13, rotatably connected to the second link and configured to be in abutted engagement with a valve lifter of intake valve 12 so that the valve lifter is pushed by cam action of the oscillating rockable cam (see figure 2).

Response to Arguments

2. Applicant's arguments with respect to claims 1-7, 9-17, 20-21, 23-24, and 26-36 have been considered but are moot in view of the new ground(s) of rejection.

Allowable Subject Matter

3. Claims 1-7, 9-17, 20-21, 23-24, 26-31 are allowed.

4. Claim 36 is objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Conclusion

5. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP

§ 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
